To Whom-It-May-Concern:

The Patrick Heath Public Library, a \$7.2 million facility, was completed in June 2011. We had the great pleasure of working with Library Interiors of Texas to furnish the building. The company is small, family-owned and has a wealth of expertise. The entire team made absolutely personally sure every piece of furniture and shelving was assembled and placed before our opening. They worked extensively with us to create custom pieces, find appropriate fabrics and quality pieces.

Of the multitude of vendors we worked with over the course of constructing the building, Library Interiors was the easiest, most responsive and customer-service oriented. You won't find a better furniture company to outfit a library.

I recommend them for any project, large or small, without hesitation.
